

Speaker Bio

Dr. Traci Potterf is a Functional Lifestyle Medicine Practitioner, Patient Advocate and founder of InnerGeniusHealth.com. She helps people untangle the root causes of illness and heal living a life they love. She received her PhD from UC Berkeley as a Jacob K. Javits fellow in a joint program with UC San Francisco Medical School. She lost 50 pounds, reversed complex illness and helped her mom into Crohn's disease remission. She realized that living against evolutionary biology makes us physically and mentally ill; however, by harnessing nature's infinite intelligence, we can unlock our inner genius and heal from cell to soul.
